SUMMARY

Frontend Developer and UI/UX Designer with hands-on freelance experience since January 2025, building responsive, high-performance web applications across e-commerce, real estate, education, and business platforms. Proficient in React, TypeScript, JavaScript, Redux Toolkit, and Tailwind CSS, with strong skills in REST API integration, responsive design, and user-centered UI/UX design using Figma. Experienced in writing clean, maintainable, scalable code and collaborating directly with clients to deliver high-quality solutions on schedule. Passionate about continuous learning and building performant, accessible web applications.

EDUCATION

Bachelor's Degree in Computer Science

2022 – 2026

New Cairo (NCA)

Completed a Bachelor's Degree in Computer Science with a strong foundation in programming, data structures, algorithms, databases, software engineering, and web development. Developed practical skills through academic projects and hands-on experience in modern frontend technologies.

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer

Remote

Self-Employed

Delivered front-end development services to direct clients and clients through freelance platforms, building responsive, high-performance web applications.

- Built responsive and scalable web applications using React, TypeScript, Tailwind CSS, and modern front-end technologies.
- Transformed UI/UX designs into clean, responsive, and interactive user interfaces
- Collaborated with clients to gather requirements and delivered high-quality solutions on schedule
- Improved website performance, responsiveness, accessibility, and overall user experience.
- Integrated REST APIs and implemented reusable, maintainable, and scalable front-end components.
- Debugged, tested, and optimized applications to ensure high performance across different devices and browsers.
- Successfully managed multiple client projects while maintaining clear communication and meeting deadlines.

PROJECTS

Taalom — Full-Stack Learning Management Platform 🌐

Frontend React 19 TypeScript Vite Tailwind CSS v4 React Router v7 TanStack Query react-hook-form Zod Axios Framer Motion i18next (AR/EN, RTL) Vercel Backend Laravel 13 (PHP 8.3) Laravel Sanctum MySQL Laravel Queues Resend API nginx + aaPanel systemd Let's Encrypt SSL

A full-stack, bilingual Learning Management System that connects multiple independent teachers with students across subjects — each with their own courses, live classes, and quizzes. Built with React 19 and a self-hosted Laravel API, featuring role-based dashboards, OTP authentication, a payment-approval workflow, and live video classrooms — deployed end-to-end with a custom domain, SSL, and transactional email pipeline.

Al Nokhba Pos & Inventory Management System

Frontend React 19 TypeScript Vite Tailwind CSS v4 React Router v7 Recharts Backend Supabase PostgreSQL Row-Level Security Auth & Authorization Desktop Tauri v2 (Rust + WebView2) Windows Installer (MSI/NSIS) Reporting/Export jsPDF html2canvas-pro

A full-stack, production-grade point-of-sale and inventory management platform built for a real sanitary-supplies retail business, shipped as both a web app and a native Windows desktop application from a single codebase. The system replaced an entirely mock/local-only prototype with a real, persisted backend: authenticated role-based access (admin/manager/cashier) backed by Supabase Auth, a normalized PostgreSQL schema with Row-Level Security, and live-derived business metrics (customer/supplier stats computed from real sales and purchase history rather than stored aggregates). Every module — POS checkout, inventory with full stock-movement history, purchase order workflow (draft → approval → receiving, with automatic stock reconciliation), sales with duplication/refund handling, and analytics — reads and writes the same real database in real time. Packaged as a native desktop app via Tauri (Rust + WebView2), giving a fully offline-capable, installable Windows application alongside the web deployment. Fully localized in Arabic with RTL layout, real PDF/CSV report exports, and a responsive UI down to mobile.

El-Noor Clinic Management System

Next.js, React, Laravel, PHP 8.3, Laravel Sanctum, Recharts, REST API, Events & Queues, PHPUnit, Vitest.

A full-stack healthcare management platform for managing clinic operations, including appointments, doctors, patients, medical records, billing, notifications, and role-based dashboards for Admins, Receptionists, Doctors, and Patients.

Built with a scalable decoupled architecture, secure authentication, RESTful APIs, audit logs, appointment availability validation, and automated Email/SMS notifications.

ATHAR — Full-Stack E-Commerce Platform

Frontend Next.js 16 (App Router) TypeScript Tailwind CSS v4 Zustand Turbopack Backend PostgreSQL (Neon) Prisma ORM JWT (httpOnly cookies) bcrypt Vercel Blob Vercel Deployment

Full-stack e-commerce storefront and admin dashboard built for an Egyptian menswear "local brand."

Includes a customer-facing store (product catalog with color/size variants, cart, checkout, order tracking) and a complete admin dashboard for managing products, categories, orders, homepage content, navigation, and site branding — all backed by a real relational database and JWT-authenticated APIs, not a static template.

Homie-Furniture E-Commerce Platform

'React.js', 'TypeScript', 'Tailwind CSS', 'Zustand', 'lucide-react', 'React Router DOM', 'react-hot-toast'

Developed a full-featured furniture e-commerce platform from scratch, including category and room-based browsing, real-time search, multi-filter product discovery, and persistent cart and wishlist using Zustand for state management. Implemented a WhatsApp-based checkout flow and a fully responsive, animated UI across mobile, tablet, and desktop.

FreshCart – E-Commerce

React • TypeScript • Tailwind CSS • Redux Toolkit • React Router

Developed a responsive e-commerce web application using Redux Toolkit for state management, featuring product catalog, category filtering, product details, shopping cart, wishlist, and a complete checkout flow with a modern, user-friendly interface.

COURSES

Frontend Web Development Training

Information Technology Institute (ITI)

Completed intensive training in Frontend Web Development, covering HTML5, CSS3, JavaScript, React, TypeScript, Tailwind CSS, Git, GitHub, responsive web design, and modern web development best practices through hands-on projects.

09/2025 – 11/2025

Benha, Qalyubia

UI/UX Design

National Telecommunication Institute (NTI)

Completed professional training in UI/UX Design, covering user research, wireframing, prototyping, design systems, usability principles, and responsive interface design using Figma to create intuitive and user-centered digital experiences.

01/2026 – 03/2026

Benha, Qalyubia,

SKILLS

Frontend Development:

- HTML5
- CSS3
- JavaScript (ES6+)
- TypeScript
- React.js
- Redux Toolkit
- React Router
- Context API
- Tailwind CSS
- REST APIs
- Vite
- Framer Motion

Tools:

Git, GitHub, Vercel, VS Code

UI/UX Designer:

Figma, Wireframing, Prototyping, Responsive Design, User-Centered Design

Soft Skills:

Problem Solving, Communication, Teamwork, Time Management, Attention to Detail
